

GOODWOOD BARK RANGE

Bark is a great multi-purpose landscape product with a range of visual and functional benefits.

Great for weed suppression, moisture retention & temperature regulation, it's also a fantastic finisher providing consistent ground cover particularly for low maintenance gardens.

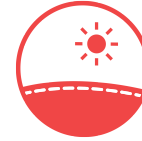

All Goodwood bark products are made using 100% sustainable NZ Pine and provide a range of size and structure options depending on your needs. See below for more details about our range.

BARK FINES

Bark Fines are a textured blend of both bark nuggets and fibrous bark pieces for a more organic look. It is screened to a consistent size of less than 30mm, and because of its texture it is also great for exposed or sloping sites.

Best suited for

- Commercial applications such as Motorway berm planting projects
- Suitable for mechanical and blower application

DECORATIVE BARK

Decorative Bark is made predominantly from bark nuggets, screened to a consistent size of less than 35mm. Its uniform appearance makes it fantastic for landscaping, providing an attractive, low maintenance ground cover

Best suited for

- Decorative Residential and Commercial Landscaping projects

RAW BARK

Our Goodwood Raw Bark is a robust bulk material and is suitable for large scale projects.

Best suited for

- Large Scale Commercial Use
