Horticulture Mulch

- Trusted by New Zealand Orchardists

Goodwood Horticulture Mulch heavy-aged mulch is a blend of aged woodchip fines and high-quality carbon content. Already in the process of breaking down, it adds valuable organic matter to enrich the soil and support orchard health. It improves soil structure and moisture retention, creating the ideal environment for strong healthy plants.

The perfect groundcover and protection for new and/or young plants.

RETAINS MOISTURE
Acts as a natural moisture reservoir, holding water and releasing it gradually to plant roots.

INHIBITS WEED GROWTH
Dense, fine mulch helps prevent new weed growth while allowing existing plants to thrive.

KEEPS SOIL COOL
Helps protect your soil from temperature extremes, reducing summer heat stress.

WON'T BLOW OR SCATTER
Engineered to mat together and hold firm, even through stormy conditions.

100% NATURAL
Adds valuable organic matter to enrich the soil and support orchard health

BEST SUITED FOR

- **Avocado Orchards**
- **Kiwifruit Orchards**
- **Vinyards**
- **Shelterbelts and Plantings**

TECHNICAL

- Mixture of chip sizes and sawdust to support optimal coverage and performance for growth
